Professional Summary

Full Stack Developer with proven expertise in modern web technologies and a track record of delivering scalable applications. Proficient in both frontend development using React, TypeScript, and Tailwind CSS, as well as backend architecture utilizing Node.js, Express, and Mongo DB. Demonstrated success in building end-to-end solutions with a focus on clean code and optimal user experience. Combines strong technical capabilities with effective team collaboration and a commitment to continuous learning.

Education

Texas Tech University, Lubbock, TX
Bachelor of Science in Computer Science
Minor in Mathematics
GPA: 3.75

Experience

Cyber Voyce, Lubbock, TX
Full Stack Intern
December 2022 – May 2022

- Designed and implemented scalable frontend layouts.
- Added functionality to key components of the frontend.
- Developed backend routes using Node.js.

Projects

GlobalRecipeBook.com

- **Technology Stack:**
 - TypeScript for a robust and maintainable codebase.
 - Node.js with NestJS framework for organized, scalable, and efficient server-side development.
- **Key Features:**
 - *Recipe Search*: Users can search for recipes from around the world.
 - *Upload Recipes*: Users can contribute by uploading their own recipes, creating a diverse collection.
 - *Global Recipe Database*: A centralized platform for finding and sharing international recipes.

- **User-Friendly:**
 - Intuitive interface for smooth navigation and user experience.
 - Efficient search functionality for quickly finding desired recipes.
- **Scalability:**
- Designed to handle a growing number of users and recipes, ensuring long-term reliability and performance.
